Aluminium & PVC

Windows, Doors & Curtain Walling

Turkington Windows has been successfully completing commercial window and door contracts for over 35 years throughout the UK and Ireland. We have extensive experience in all areas of commercial window and door installation in both Aluminium and PVC. Turkington install only the highest quality window and curtain walling systems to meet the aesthetic and functional requirements of architects, specifiers and contractors.

As part of our commitment to excellent service we can provide project specific U-value calculations to ensure thermal performance requirements are met. We also provide working CAD drawings and design details to architects and contractors as required.

All our Window and Curtain Walling products have been rigorously tested to BS EN standards for wind resistance, water tightness and air permeability.

Product options include:

- High and Low Rise Aluminium Curtain Walling
- Toggle Glazed and Silicone Pointed Curtain Walling for clean sight lines
- Structural and bolted glass Curtain Walling and Balustrades
- Fire Rated Aluminium Curtain Walling and Windows
- Atrium and Roof Glazing
- Horizontal Sliding Windows and Secondary Glazing
- Aluminium Windows
- PVC Windows and Doors – replacement and new
- Composite Doors

from top, clockwise:

Group 4 Security

A high specification and highly secure Alarm Response Centre in Belfast. The work involved security grade glazing and included the installation of low-e tinted glazing and MX Curtain walling.

European Union Offices

A redeveloped office building in Belfast that included a front façade that leans away from the building to overhang the street. It incorporated three glass roofs in addition to curtain walling, windows and balcony doors.

Lynn Hall

This residential project in Bangor for the Lagan Group was for the supply and installation of high specification PVC windows, French doors and composite front doors.

Expertise Guaranteed

Areas of Expertise:

- Commercial and Retail
- Education
- Public Sector
- Healthcare
- Residential
- Aluminium and PVC Windows, Doors & Curtain Walling

from top, clockwise:

Tesco Extra, Craigavon

One of the largest Tesco stores in Ireland this included large roof lights to introduce natural light to the sales area and Clerestorey glazing to the side elevations as well as a fully glazed atrium to the front.

Omniplex, Craigavon

This eight-screen cinema complex involved the installation of a large atrium at the front of the building to bring natural light into the foyer. The project included the installation of aluminium glazing and glazed entrance doors.

Coopers Mill

A quality residential development for the McGinnis Group in Dundonald; this project required the supply and installation of high specification PVC windows and composite doors.

Service Guaranteed

At Turkington Aluminium & PVC we have built our reputation on the quality of our installation and service. We realise the importance of getting jobs completed to specification and on budget. Our aim is to always deliver on time, on budget and to the satisfaction of the client.

Eikon Exhibition Centre

Installation of 500sq m of aluminium glazing to the front elevation of the new Eikon Exhibition Centre. It comprises thermally broken curtain walling and thermal doors. Curtain walling lengths were cut on-site to achieve precise angles that give the illusion of a continuous radius.

Quality Guaranteed

At Turkington Aluminium & PVC we have very stringent controls over the quality of the products we install. We use only the most up-to-date, modern looking and energy efficient systems manufactured to the highest quality standards – guaranteeing a quality finish every time.

Turkington are members of the Glass and Glazing Federation and are CWCT approved installers.
All Turkington products comply with latest building regulations.

from top left, clockwise:

Law Society House

A five storey office and retail development in Belfast comprising a centre-piece, multi-floor entrance foyer – critical to the design and its performance. The façade incorporated Brise Soliel bronze anodised aluminium frames and solar control glazing. In addition, flashing details were bespoke designed to ensure the intricate finish was accurately completed.

Drumford Meadows

This was a residential project in Portadown by Antrim Construction Company. It involved the supply and installation of high specification PVC windows and doors.

Ulster University

This project at Cranagh, Coleraine involved the supply and installation of Secured by Design PVC windows and doors to student accommodation buildings and an administration block. The project comprised 350 rooms in 70 apartments within a mixture of two and three storey blocks.

from top left, clockwise:

Wood Green Care Home

A high quality, high specification project in Jordanstown. This impressive care home involved the supply and installation of PVC windows, doors and screens. All work was to an extremely high standard in keeping with the project's requirements.

Waddon House

Waddon House was a large PVC double glazed replacement project in a multi-storey domestic dwelling in Croydon, London. The contract involved the removal and installation of double glazed PVC windows, the installation of PVC curtain walling and communal doors and the installation of trims and liners to window reveals for the completion of internal decoration.

Price Guaranteed

Our aim is to provide a quality service and product whilst meeting budget requirements of individual projects. Our experienced design and estimating teams will help value engineer workable solutions to ensure best possible cost efficiency within budget and specification constraints.

from top left, clockwise:

Musgrave Street District Command

This is a multi-storey, mixed use facility in central Belfast. The project involved the installation of aluminium windows and curtain walling; the installation of high-spec blast-proof glazing and aluminium screening.

St Benedict's College

Work at this Randalstown college included the replacement of defective windows with new PVC windows throughout; concrete repairs; new steel lintels & concrete cills. All work was carried out in a live school environment.

Our Lady & St Patrick's School

A large scale project for O'Hare & McGovern at a grammar school in Knock involved the supply and installation of aluminium windows, doors, curtain walling and automated roof lights.

Colby House

This large scale project on a prestigious government building in Belfast required considerable project management to provide and install aluminium windows, doors and curtain walling.

Aluminium & PVC

Architectural Roof Glazing

We can supply a full range of architectural roof lights in a variety of designs. They are made to specified designs and include mono-pitch, A frames and multiple A frames. Additions such as electric vents are also part of the product range.
